

AI Research Engineer – Take Home Coding Assignment

Congratulations on being shortlisted for the AI Research Engineer role, working under Prof. Mitesh Khapra at AI4Bharat, IIT Madras. As the next step in the process, we'd like you to complete the short coding assignment described below.

The Task

Pick **ONE** of the three Bodhan AI models below and fine-tune it on Marathi:

- Machine Translation (MT) model
- Automatic Speech Recognition (ASR) model
- Text-to-Speech (TTS) model

Guidelines

- You're free to use any coding assistant (Copilot, Cursor, Claude, ChatGPT, etc.) to help you.
- You're free to choose your own approach, framework, and tooling for the fine-tuning.
- Dataset / corpus: Pick one of ***Marathi/Bhili ASR, TTS, Translate dataset*** from *AIKosh* or *Huggingface*

What We're Evaluating

This assignment is not scored on model performance or evaluation metrics. What we're looking for is:

- Whether you can get a fine-tuning run working end-to-end
- How you structure and write your code
- The effort, judgement, and problem-solving you bring to the training process

Deliverables

- Your code, shared as a GitHub repository link
- Any related artifacts (checkpoints, logs, outputs), shared via a Google Drive link
- Detailed documentation of your approach – what you did, why you made the choices you did, and any challenges you faced

Submission

Reply to this email with your GitHub repo link, your Google Drive link, and your documentation.

Deadline: 24th September 2026 by 6 PM

Please reach out if you have any questions. We look forward to seeing your work.
